MPH Thesis: Catastrophic Health Expenditure among rural area of Waghodia, Vadodara. – July to December 2019.

Description: Despite large investment in central and state sponsored health insurance schemes and other government health facilities, out of pocket expenditure and catastrophic healthcare expenditure remain high. It is very important to consider whether provision of free services will reduce out of pocket expenditure or not. So present study was conducted with the aim to assess out of pocket expenditure (OOPE) and catastrophic health expenditure (CHE) among households along with factors affecting it.

Presented Research Paper: Catastrophic Health Expenditure among rural area households of Waghodia, Vadodara. **Conference:** Advance in healthcare management service – 5th IIMA International Conference – 14/02/2020 to 16/02/2020.
