"Adding Health to Life"

Dear Friends,

The World Health Organization (WHO) defined health in its broader sense in 1946 as ***"a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity."***

Our body is a complex system working continuously like a machine. And its our responsibility to take care of it. Thanks to the advancements of modern medicine, people around the world are living much longer lives. And now the goal of medicine is not just to improve the longevity of life but its quality as well.

Just like investing in a retirement fund, it is extremely important to invest in your health today in order to enjoy a healthy and productive life in your later years. Of course, unexpected circumstances are part of life and often unavoidable. Sometimes sudden accidents and illnesses can hamper our ambitions and seriously reduce our quality of life. For this reason, it is extremely important for us to do everything in our means to mitigate the risks of the unknown.

By educating ourselves as much as we can about our health and taking the proper measures to take care of our bodies, we can greatly increase our chances of avoiding or at least correcting and managing health problems as soon as they begin to surface.

Nidhi Hospital likes to prevent and cure health problems and promote good health in Community by its motto of **"Adding Health to life"**

Health Check-ups are extremely important. It helps you find out if you have a particular disease or condition even if you feel perfectly well, without any symptoms and/or signs of disease. Early detection, followed by treatment and good control of the condition can result in better outcomes, and lowers the risk of serious complications. It is therefore important to get yourself screened even if you feel perfectly healthy.

Health check-ups or health screening involves the use of tests, physical examinations or other procedures to detect disease early in people who look or feel well. This is different from diagnostic tests which are done when someone is already showing signs and/or symptoms of a disease.

Therefore, by investing today in tomorrow, we can transform the unknown and unexpected into the known and managed.

Moving a step ahead for a healthy life, Nidhi Hospital presents variety of Health check plans at affordable rates.
